electric@nd.gov / www.ndseb.com

James Schmidt EXECUTIVE DIRECTOR
Douglas Grinde DIRECTOR OF INSPECTIONS
Paula Glass OFFICE MANAGER

At recent North Dakota State Electrical Board meetings, the board has discussed the following and would like your opinion on whether or not a power limited technician license is needed in North Dakota similar to other states. For the board to continue, they are asking for your input so please review this rough draft language below (will be revised as needed), complete the survey below and return it to the board office.

Rough Draft for Proposed Power Limited Requirements for North Dakota:

Power Limited Technician (PLT) Requirements: *A statewide license is required for: Power Limited Technician (PLT) – an individual having the necessary qualifications, training, experience, and technical knowledge to install, alter, repair, plan, lay out, and supervise the installing, altering, and repairing of electrical wiring, apparatus, and equipment for technology circuits or systems, and who is licensed as a PLT by the NDSEB. "Technology circuits or systems" means systems covered by the National Electrical Code, articles 640, 720, 725, 727, 770, 800, 810, 820, 830, and 840. The planning, laying out, installing, altering, and repairing of technology circuits or systems must be performed in accordance with the applicable requirements of the National Electrical Code pursuant to section NDCC. "Technology System Contractor" means a licensed contractor whose responsible licensed individual is a licensed Power Limited Technician (PLT).*

Thank you for your input in advance.

_____ _____
(please print your name) (please print your occupation)

☐ Yes I would support some version of PLT licensure ☐ No I would not support
(Please mark an X for your choice on the line above)
